

# LMC SURVEY - Impact of Transfer of Work from Secondary Care - August 2020

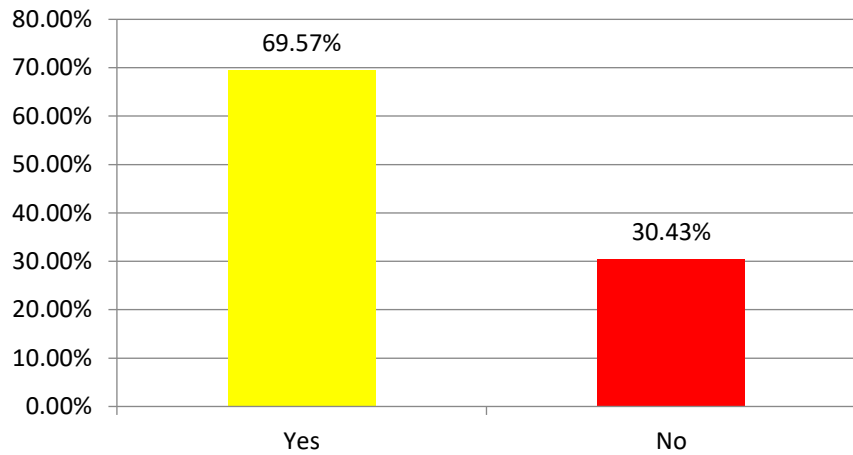

No. of Practices Responded: 47/73%

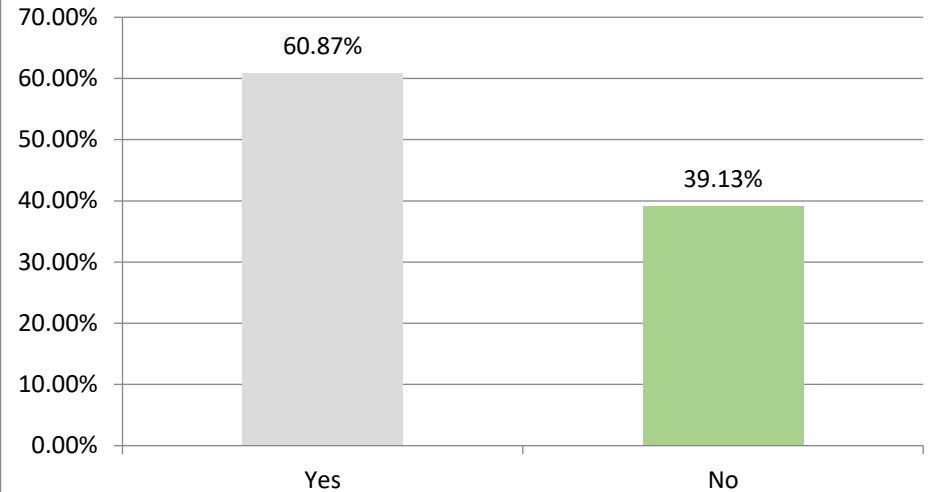

Period Covered: June to August 2020

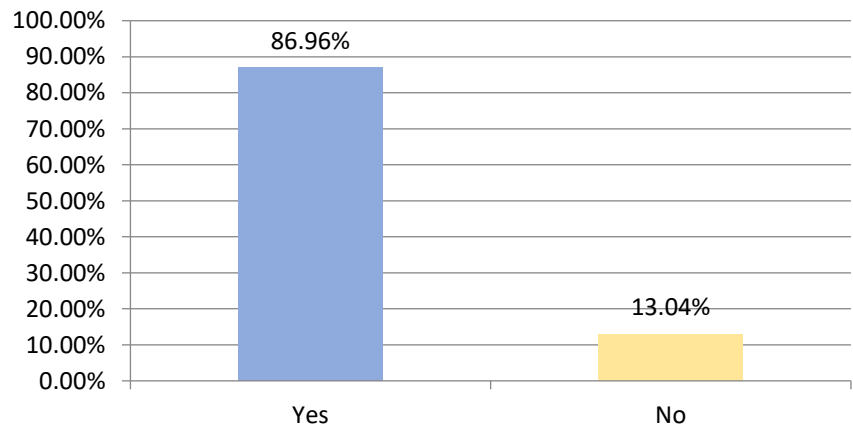

Is this additional workload reducing your ability to provide basic primary care to your patients?

Do you consider the additional workload to be unsafe for patient care?

Do you feel pressured by the other organisations to provide this additional work?

Is this having a detrimental effect on staff morale?
